

# **Awake, Asleep, or Away Honeywell Home Keeps Your Family Safe**

Monitored Smoke and Carbon Monoxide Detection

# Protect What Matters Most with Monitored Smoke and Carbon Monoxide Detection

**The Honeywell Home 5800Combo is the first ever professionally monitored, combination smoke and carbon monoxide (CO) detector for unmatched protection.** The award-winning system detects dangerous levels of smoke and colorless, odorless CO – which could go unnoticed by you and your family. A local alarm sounds so you're notified ASAP and it automatically alerts the 24/7 central station so help arrives quickly.

## Why You and Your Family Need Professionally Installed and Monitored Protection

### The help you need, the moment you need it.

- **First responders are automatically alerted** – unlike non-monitored detectors that could let fire or CO spread if you're in the yard, at work, or just don't notice early warnings.
- **Get audible, visible, and verbal** (English or Spanish) alerts with clear directions and dual color LED lighting that tell you exactly what the condition is and what to do in case of an emergency.
- **Loud notifications wake you** day or night for around-the-clock protection.
- **Minimize injuries and damage** to your home with fast-acting emergency assistance.
- **Don't forget about pets.** With non-monitored systems, how will your pet escape if you aren't home to let it out during an emergency?
- **Low battery and end-of-life notifications** help ensure detection is always in working order.
- **A 10-year life** on smoke and CO sensors provides lasting protection.
