

COMPASS 2.0 DOWNLOADER

Compass 2.0, the new version of the Honeywell Home Compass Downloader, is packed with exciting new enhancements! The following screenshots provide an easy to follow guide in showing how to maximize the usefulness of this tool.

Compass 2.0 Intuitive Help Screens

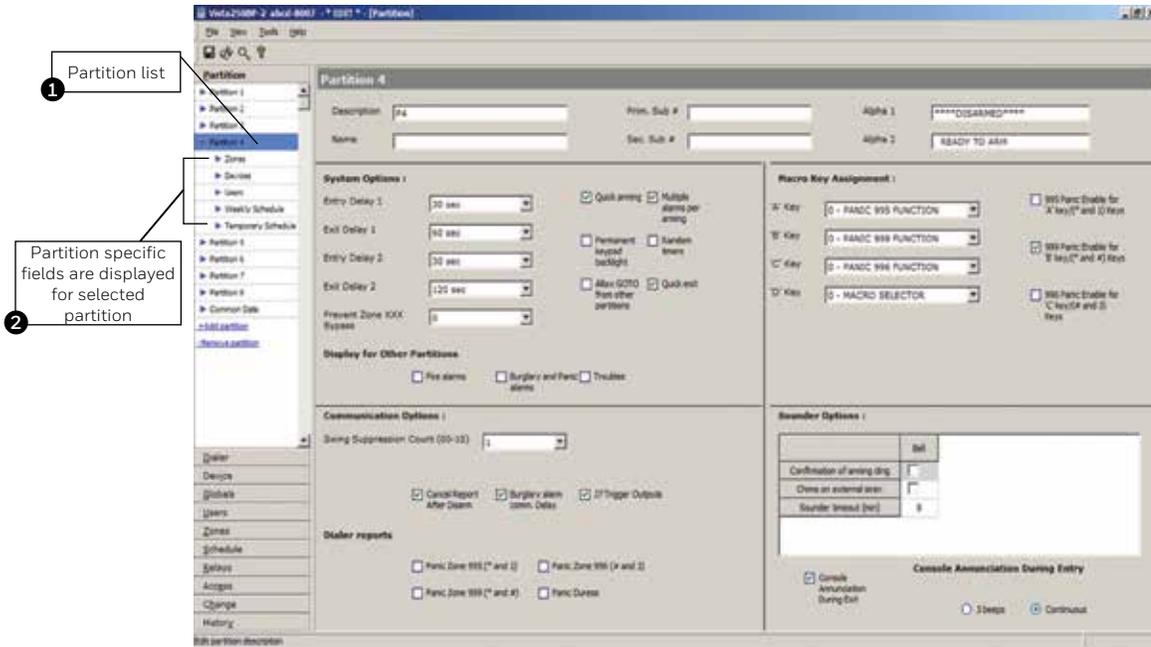

Press F1 to get help

- Support for Application Level Help
- Support for Context-Sensitive F1 Help for all screens – Customer screen, Panel Configuration and Communication Engine

COMPASS 2.0 DOWNLOADER

Compass 2.0 Intuitive Help Screens

Information organized in four quadrants

- Related information is presented together for better understanding
- Provision to review configuration changes in a session prior to saving it

COMPASS 2.0 DOWNLOADER

Improved Panel Configuration Users Screen

1 Search the user code without scrolling

2 Explicit grid for authority level & other options

3 Select to view relays configuration (next screen)

User	Code	User Name	Master Partn.	Access Group	AUE Desc	P1 AOBJ	P2 AOBJ	P3 AOBJ	P4 AOBJ
1	5140		1 P1	0	INSTR.	0YNN	0YNN	0YNN	0YNN
2	1234		7 P7	0	MASTER	1YYY	1YYY	1YYY	1YYY
3									
4									
5									

Partition	Authority Level	Open/Close	Global Arm	Group Bypassing
1	0 Installer	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2	0 Installer	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3	0 Installer	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4	0 Installer	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5	0 Installer	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

User set-up made easy

- Explicit grid for user authority level makes both configurations and verification of values easy and less prone to error
- Changes done in the user tabs will be updated in the respective partition sub tabs and vice versa

Improved Panel Configuration Scheduler Screen

The screenshot shows the 'Schedule' tab in the Compass 2.0 Downloader software. The interface includes a menu bar (File, View, Tools, Help), a toolbar, and a sidebar with various configuration options. The main area is titled 'Time Windows' and contains a 'Time Window' dropdown, 'Start Time' and 'End Time' fields, and 'Clear Start Time' and 'Clear End Time' buttons. Below this is a 'Time Window's Configuration' table with columns for days of the week (00-19) and rows for Time Windows (TW 1-14). The table shows scheduled time windows with color coding: green for active periods and orange for inactive periods. Annotations point to the 'Schedule' tab, the 'Time Window' dropdown, and the color coding in the table.

1 Schedule tab

2 Drag cursor to set schedule

3 Color coding to distinguish rows

Time Window	00	01	02	03	04	05	06	07	08	09	10	11	12	13	14	15	16	17	18	19
TW 1																				
TW 2																				
TW 3																				
TW 4																				
TW 5																				
TW 6																				
TW 7																				
TW 8																				
TW 9																				
TW 10																				
TW 11																				
TW 12																				
TW 13																				
TW 14																				

Scheduling made easy

- Logical grouping of controls in the screen and grids makes configuration and verification easy and less prone to error
- Color coding clearly depicts the configured values

Interactive User Interface

The screenshot shows the 'Compass Communications' application window. It features a menu bar with 'Options', 'Activity Log', 'Status', and 'Help'. The main area is divided into several sections: 'Subscriber Information' with fields for First Name (Jim), Last Name (Beveridge), Panel Name (Vista21IP), Receiver # (Villa), Account # (8853), Rev. # (1.0), and Seq. # (1); a 'Commands' list on the left; a 'Selected Commands' list on the right containing 'E:ventLogAll', 'EverLogBypasses', 'EverLogOpenClose', 'EverLogTroubles', and 'EverLogSystem'; and a status area at the bottom showing 'Active Port : COM1' and 'Modem : COM1 - Ademco CIA 2400'. A progress bar at the bottom indicates 'Uploading Everlog (All events)'. Six numbered callouts provide the following information:

1. Status to read last panel status
2. Drag and drop multiple commands for execution
3. Cancel a command under execution
4. Port used for communication
5. Lists commands targeted for the panel
6. Status of commands executed

Customer screen more informative

- Activity log can be viewed or exported in the interactive mode. Log can be enabled or disabled by the user.
- Event logs are automatically saved to the database, and history of event logs can be viewed for all panels
- User can see the previously executed commands in the interactive mode

COMPASS 2.0 DOWNLOADER

Unattended User Interface

The screenshot shows the 'Unattended Server Activities Viewer' window. It features a top menu bar with 'Settings', 'View', and 'Help'. Below the menu is a 'Server Type' dropdown set to 'ADEMCO' and an 'Available Port' dropdown set to 'TCP/IP 2 - ADEMCO'. There are buttons for 'Start Port', 'Refresh Port', and 'Exit'. The main area is divided into several sections: 'Pending Jobs' and 'Retry Jobs' on the left; 'Subscriber Information' in the middle-left, showing details like 'Subscriber Date - Time: 10/14/2009 6:23:37 PM' and 'Download Date - Time: 10/14/2009 6:29:52 PM'; 'Panel Information' in the middle-right, showing 'Account Number: FFFF', 'Panel: Vista32FB', 'Revision: 5.0', and 'Sequence Number: 1'; and 'Commands' in the bottom-right, listing 'UploadSystem', 'Arm', 'Disarm', 'DownloadDST', and 'EverLoadAlarm'. At the bottom, there is an 'Activity Log' table with columns for 'Date - Time' and 'Activity'. The table contains several entries with timestamps and descriptions of events like 'TCPIP: Fresh Status Troubles COMMAND: Vista32FB - 5.0 Acc#: 1111 - 1111'. Callouts with numbers 1 through 6 point to various elements: 1 points to the 'Available Port' dropdown; 2 points to the 'Subscriber Information' section; 3 points to the 'Activity Log' table; 4 points to the 'Available Port' dropdown; 5 points to the 'Panel Information' section; and 6 points to the 'Commands' list.

1 Ports on which scheduled jobs are executed

2 View status of the job executing

3 Activity log of current job

4 List of ports available for scheduling

5 Panel model and revision of the current job

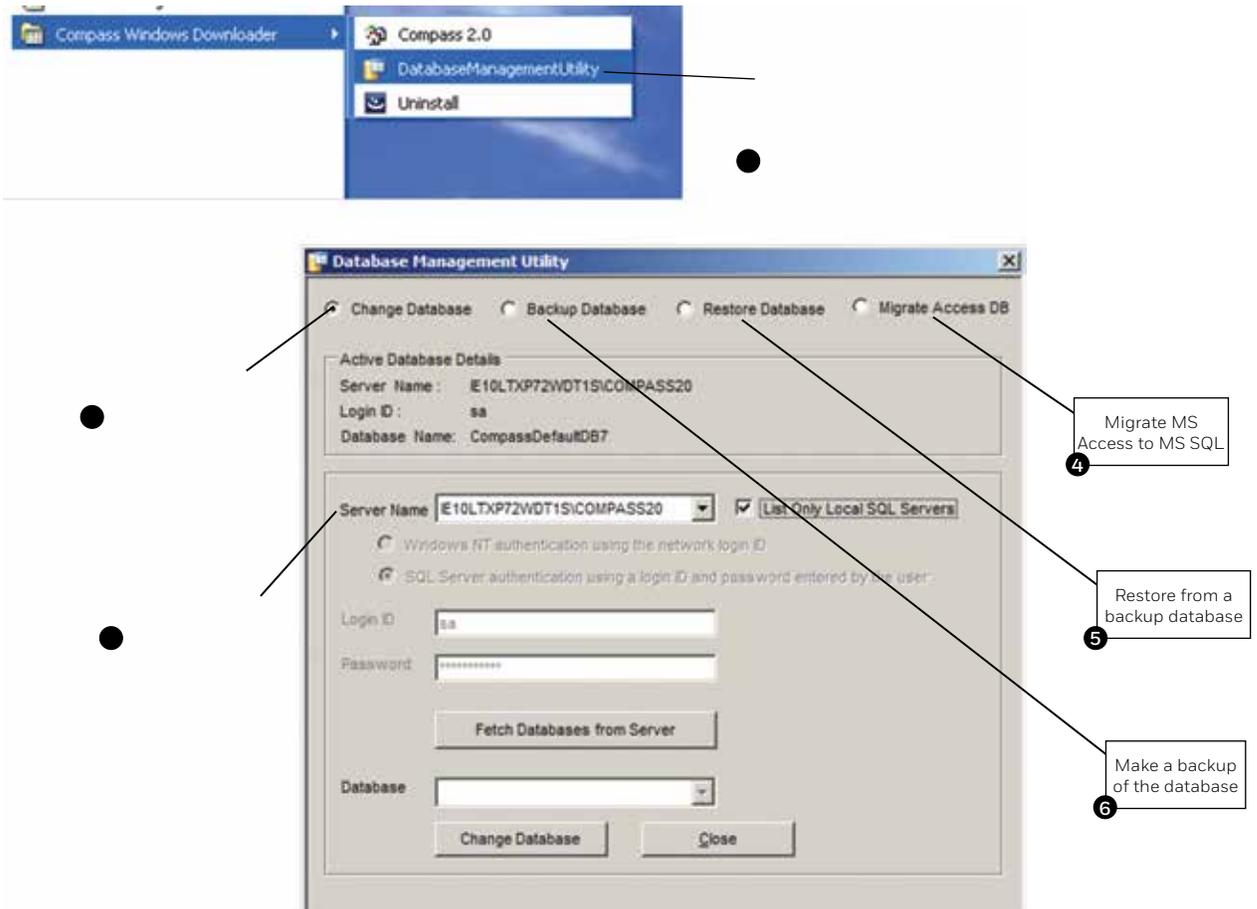

6 List of commands executing for current job

Multiple jobs from one screen

- Execute and monitor all your dial-up and IP jobs from one screen
- Activity log can be saved as a text file
