

LYNX Plus

Top Reasons to Purchase the LYNX Plus

Higher Closing Ratio with Improved Aesthetics

- New, updated look and smaller size will increase consumer appeal and drive more sales
 - LYNX Plus is 20% smaller than the LYNXR-2
- GSM radio antenna fits right inside the case
- Supports Honeywell's new family of small, easy-to-install sensor transmitters

Close More Business with Simplified End-User Experience

Clear 2 x 16 backlit display is easy to read and provides greater awareness by spelling out the exact type and location of an alarm in plain English.

Increase RMR with Two-Way Voice Even When No Phone Lines Are Available

LYNX Plus supports two way voice applications over the GSM radio—providing more RMR opportunities when installed in cell phone-only and VoIP households.

Further Increase RMR and Reduce Attrition with Total Connect

When used with Total Connect Remote Services, LYNX Plus lets homeowners arm, disarm and check the status of their security system via their PC, laptop, cell phone, BlackBerry®, iPhone®, iPod touch® or any compatible wireless handheld device and receive e-mail alerts about important events, including when children arrive home from school, a gate is open or motion is sensed in a protected area.

Simplify Installation with the New Single Board Design and Hinged Cover

The single board design and hinged cover make LYNX Plus easy to wire and mount on a wall.

Simple Radio Installation with Signal Strength Information on Display

- The GSM radio and antenna installs easily in the unit
- The GSM signal strength indicator on the display helps installers easily find the best location
- Keypad-initiated registration enables installers to register the radio without opening the case

Reduce Programming Time with a New Programming Interface

Programming prompts displayed in plain English can reduce mistakes for experienced installers and training time for new installers.

Increase Applications with Hardwired Zone

The hardwired zone increases flexibility and reduces material costs for dealers when mounting LYNX Plus close to a door or window.
