

VIDEO MONITORING

Remotely look in on your property, kids, babysitters, elderly relatives, pets, housekeepers, contractors and more with **Honeywell Total Connect™ Video Services**. You can also receive video notification or pictures of activities when they occur—such as your child arriving home from school or when a delivery has been made—on your smartphone, laptop or any web-enabled device. You can even view video in low light or dark environments for added peace of mind.

REMOTE SERVICES

With **Honeywell Total Connect Remote Services**, you can control your lights, locks, thermostats, IP cameras and security system on the same mobile devices you use every day—whether you're across the street or across the world! You can also receive important alerts in real time and keep tabs on vehicles and assets via GPS tracking.* It's the best way to stay protected and connected.

*Available in U.S. only.

Connected Home Solutions for Every Lifestyle and Budget

Connected Home solutions and programmable thermostats can reduce energy costs by up to 15%.¹

Enter your home and have the lights and temperature set perfectly for your arrival? Get a video alert when your child gets home from school? Unlock a door or control your security system via your smartphone? You bet!

Whether you're looking to save money, conserve energy or live a more comfortable life, Honeywell has a Connected Home solution that can work with your lifestyle and budget and grow with your changing needs. Ask your security or custom electronics professional for more details.

SAVE MONEY AND ENERGY

Our basic energy management solutions can automatically adjust your thermostat or turn your lights on or off when you use your security system. The result? A lower energy bill and higher comfort level. It's simply the easiest way to save money while conserving resources every day.

STAY CONNECTED AND IN CONTROL 24/7

Want to manage your security system with the sound of your voice? What about the ability to view video or control your lights, locks, garage doors

and shades on your smart devices—whether you're at home or away? If you can dream it, we can do it! We can even add easy, affordable wireless home control to your existing security system with no installation hassle or mess. Honeywell puts the connected home within reach for everyone, with a variety of solutions that help you live a safer, smarter, more comfortable life.

HOME ENTERTAINMENT OPTIONS

Entertainment in your home can be a high-quality, cinematic experience when you integrate your Honeywell system with popular home systems from vendors like Crestron®, Control 4®, Lutron® RadioRA® 2, Savant®, Universal Remote Control or Key Digital®. Transform your living room into a home theater with the touch of a button.
