

Lyric™ LTE Communicators

Frequently Asked Questions

GENERAL

1. What is LTE?	LTE refers to Long Term Evolution—a standard for high speed wireless communication.
2. What is the part number of the LYRIC LTE Radio?	LYRICLTE-A.
3. What does the A stand for?	AT&T network compatible.
4. Will Honeywell have a Verizon LTE Radio for LYRIC?	Yes. Expected release in Q4.
5. What if there is no LTE network available at the installation?	LYRICLTE-A includes “3G fallback” (compatible with AT&T LTE and 3G networks.)
6. Does LYRICLTE-A support 2 way voice service?	Yes. Currently, 2-way voice is supported over GSM, with plans for Voice Over IP (VOIP)/Voice Over LTE (VOLTE) later this year.
7. In what coverage areas does the LYRICLTE-A operate?	Coverage is for U.S and Puerto Rico only.
8. Which LYRIC control panels are LTE ready?	The LCP500-L currently supports the LTE radio. The LCP300-L is expected to support LTE Q3 2017.
