

VIDEO MONITORING

Remotely look in on your business, employees, property and more with **Honeywell Total Connect™ Video Solutions**. You can also receive video notification or pictures of activities when they occur—such as an employee entering a restricted area—on your smartphone, laptop or any web-enabled device.

REMOTE SERVICES

With **Honeywell Total Connect Remote Services**, you can control your lights, locks, thermostats, IP cameras and security system on the same mobile devices you use every day—whenever you want, wherever you are. You can also receive important alerts in real time and keep tabs on company vehicles and assets via GPS tracking.* It's the best way to stay protected and connected.

*Available in U.S. only.

Connected Buildings

Honeywell

Automation, Energy Management and Video Monitoring for Small Businesses

Connected Business solutions and programmable thermostats can reduce energy costs by up to 15%.¹

Enter your business and have the lights and temperature set perfectly for your arrival? Get a video alert when your employee gets to work or leaves early? Unlock a door or control your security system via your smartphone? You bet!

Whether you're looking to save money or conserve energy, Honeywell has a Connected Business solution that can work with your budget and grow with your changing needs. Ask your security or custom electronics professional for more details.

SAVE MONEY AND ENERGY

Our basic energy management solutions can automatically adjust your thermostat or turn your lights on or off when you use your security system. The result? A lower energy bill and higher comfort level. It's simply the easiest way to save money while conserving resources every day.

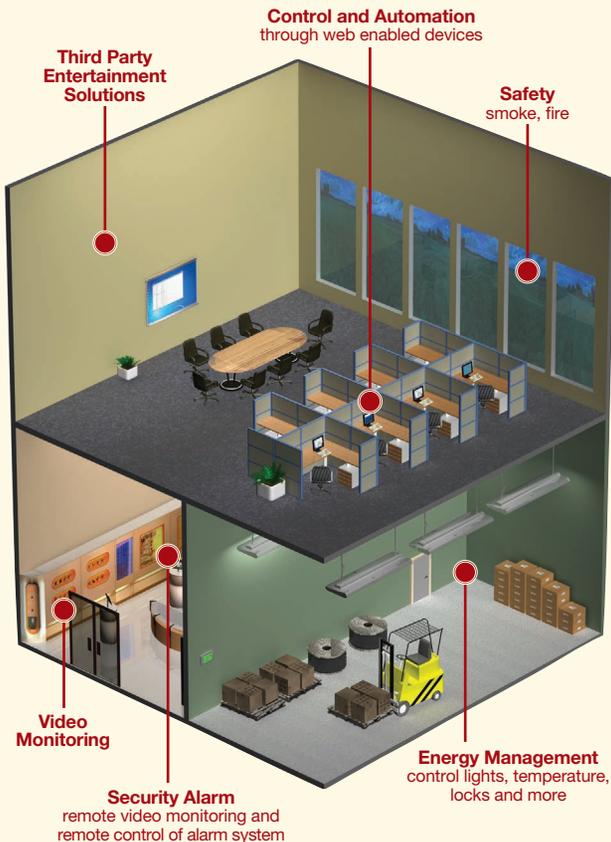

STAY CONNECTED AND IN CONTROL 24/7

Want to manage your security system with the sound of your voice?

What about the ability to view video or control your lights, locks and shades

on your smart devices—whether you're at the office or offsite. If you can dream it, we can do it! We can even add easy, affordable wireless business control to your existing security system with no installation hassle or mess. Honeywell puts the connected business within reach for everyone, with a variety of solutions that help you manage your business safer, smarter and more effectively.

THIRD PARTY BUSINESS DESIGN SOLUTIONS

Whether you need commercial lighting, video conferencing, telecom systems and more, Honeywell Security supports a number of third party systems such as Crestron®, Control4®, Lutron® RadioRA®2, Savant®, Universal Remote Control or Key Digital®.
