INFORMATION FOR SECURITY DEALERS

Connect to Opportunity with the Connected Home and Business

Honeywell

Tuxedo Touch™ and Honeywell Total Connect™ ... a Great New Opportunity!

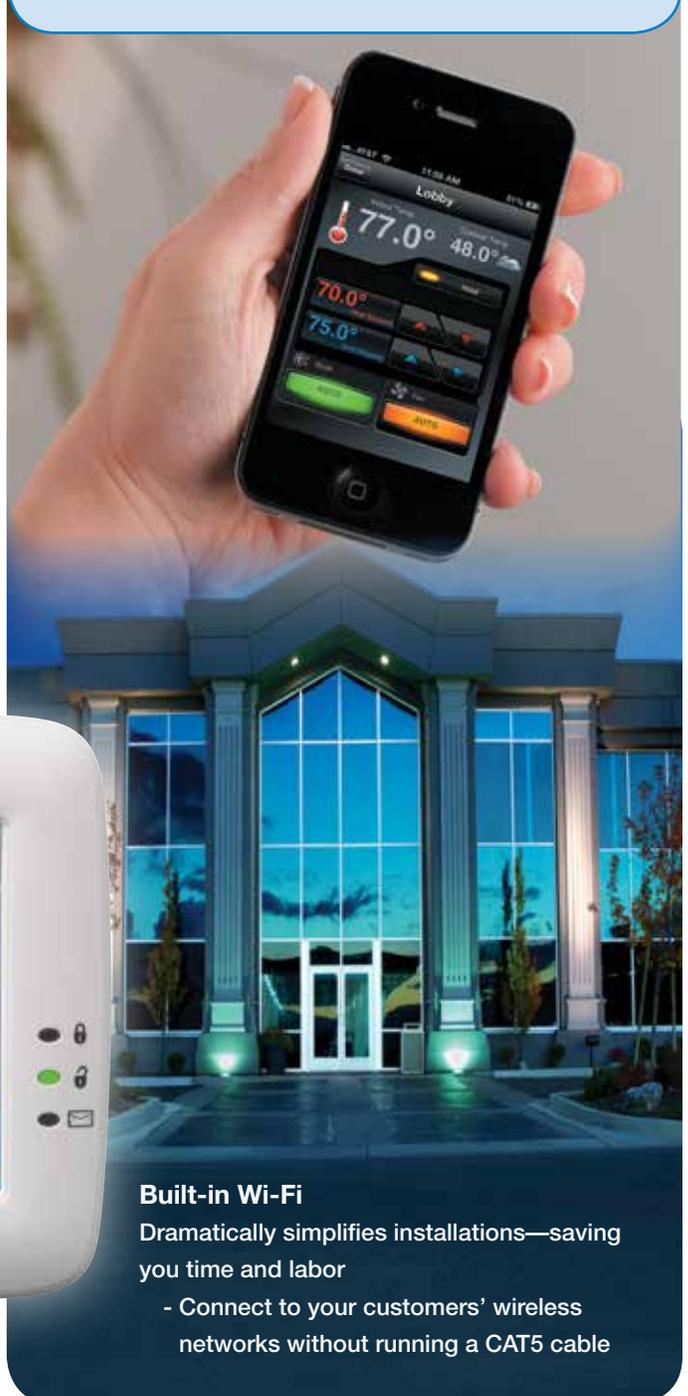

Advanced home and business security and automation controller, camera viewer, digital picture frame and VISTA® keypad with built-in Wi-Fi—all in one easy-to-use interface.*

If you've been looking for the perfect opportunity to build your business by including home and business control as part of your security package, look no further than Honeywell's Tuxedo Touch. The magnificent, 7" high-resolution graphic touchscreen provides you with the most user-friendly, affordable way to tie all of the technology in your customers' homes and businesses together—including security, cameras and Z-Wave® enabled thermostats, lights, locks and shades. **Plus, it works with Honeywell Total Connect Remote Services—a great way to grow your business and RMR!**

The result? You'll make your customers' homes and businesses more comfortable and efficient and your business more profitable for a fraction of the price of other automation solutions. What could be better than that?

Great Upgrade Potential!

With millions of VISTA® control panels already installed, Tuxedo Touch offers you a great opportunity for retrofits and upgrades never before possible.

Built-in Wi-Fi

Dramatically simplifies installations—saving you time and labor

- Connect to your customers' wireless networks without running a CAT5 cable

**Hardwired and Wi-Fi® versions available.*

Honeywell Total Connect™ Remote Services

If you're looking for additional RMR, consider offering Honeywell Total Connect with every Tuxedo Touch™ installation. Your customers can receive email and video alerts about important events in and around their homes or businesses. Whether using a PC, iPhone®, iPad®, Android™ or other compatible mobile device, the function icons look and operate just like the ones on the Tuxedo Touch™ touchscreen!

Your customers can:

- Control their Z-Wave® enabled lights, locks, thermostats and shades—a great way to save money and energy
- Receive notifications via email, text messages or video alerts
- Keep an eye on their kids, babysitters, elderly relatives, pets, workers and property via remote video
- Know if valuable objects like antiques, paintings or electronics have been moved
- View employee behavior and keep a watchful eye on cash registers, stockrooms, loading docks, exits and entrances via remote video
- Protect inventory, avoid disruption of business and create a safer work environment by being alerted to floods, leaks and extreme temperature changes
- View up to 100 sites with one login—great for vacation home owners, franchise owners and real estate investors

Same graphic icons as Tuxedo Touch!

Portable indoor and outdoor cameras—can be placed virtually anywhere!
Ideal for both local and remote video viewing.

Local Video Viewing

With Tuxedo Touch, customers also have the option to view live video of up to four cameras locally on the touchscreen, smartphones, tablets or televisions.

This option does not require Honeywell Total Connect.

Unlock the Possibilities

Did your customers' kids forget their keys again?

With Z-Wave enabled door locks, end-users can now unlock the door from the comfort of their offices or wherever they are—right from their smartphones, PCs or other compatible wireless mobile devices.

iPhone and iPad are registered trademarks of Apple® Inc.

Great for Retrofits

Honeywell VISTA® is the #1 selling control panel in the industry. Tuxedo Touch™ and Honeywell Total Connect™ Remote Services can be easily installed in homes or businesses with existing VISTA panels—providing you with a great opportunity to add new services and increase your company's RMR.

Set the Scene

Event-driven Scene Setting

Increase your sales and your customers' peace of mind when combining Honeywell's VISTA panel, Honeywell sensors and Tuxedo Touch for event-driven scene setting. For example, if a child wakes up at night and enters a dark hallway, a motion sensor can trip a Z-Wave® light to come on automatically and help safeguard them against trips or falls.

Scene Scheduling

Tuxedo Touch™ makes it easy to set scenes that occur on a regular basis through Z-Wave® technology—helping your customers save money and conserve energy. For example, residential customers can unlock the front door for a babysitter or housekeeper at the same time every week, set the lights to turn off when they leave their homes in the morning and turn on before they arrive home at night. Commercial customers can lock and unlock doors on schedule for daytime employees and at a specific time after hours for maintenance workers. The only limitation is their imagination!

The Sunrise/Sunset feature takes the hassle out of programming the seasonality of dawn and dusk virtually anywhere in the country. There is no need to continually re-program the devices!

Security Made Simple

Tuxedo Touch integrates Honeywell VISTA® security functions seamlessly with Z-Wave® devices such as thermostats, lights and locks, and is extremely cost-efficient, simple to install and easy to use.

- Whether arming or disarming the security system, bypassing zones, accessing the event log or controlling lights, locks or shades, operation is intuitive and simple
- Icons are immediately recognizable by function to make operation crystal clear
- End-users can lock and unlock doors from wherever they are on premises, automatically when arming and disarming the security system or remotely with Honeywell Total Connect™ Remote Services
- Voice feature speaks system status clearly so you can act quickly when seconds count
- Prompts and graphics are easy to read and highly visible on the bright, crystal clear screen—reducing end-user training time
- 24/7 video surveillance accessible on the keypad, TV, smartphones, tablets and other web-enabled devices
- No complicated commands or blinking lights to interpret

Smart Server...Smart System

A built-in web server lets your customers control Tuxedo Touch locally in their home or facility on an iPhone®, iPad®, Android™, BlackBerry®, web-enabled TV or any compatible wireless mobile device. They can also have local weather delivered directly to Tuxedo Touch.

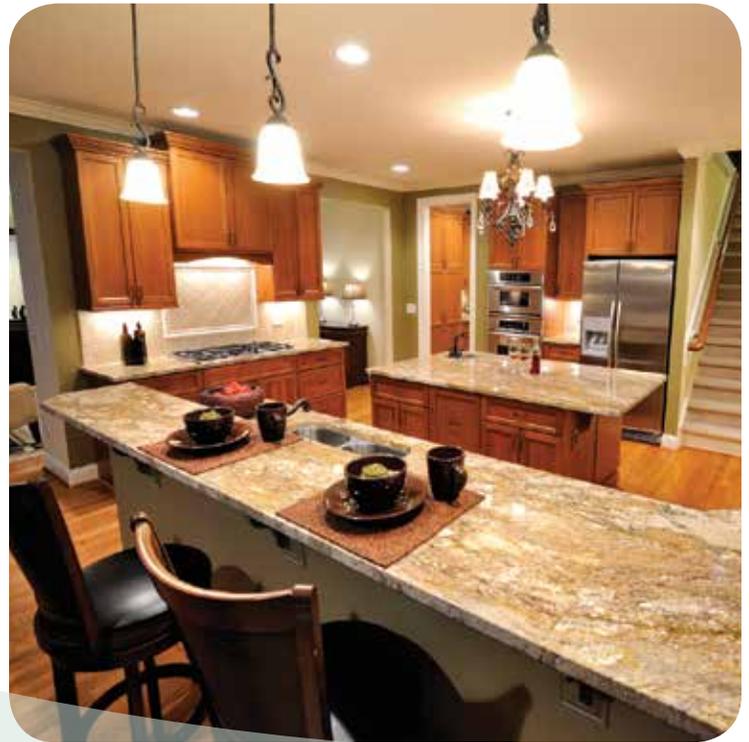

iPhone® and iPad® are registered trademarks of Apple Inc. All other trademarks are property of their respective owners.

Energy Management and Savings

Lighting

Tuxedo Touch™ makes automated household and workplace lighting a snap! Homeowners can turn Z-Wave® enabled indoor and outdoor lights on or off every time they arm or disarm their security systems. This is a great way to save money and energy while they're away and allows homeowners to enter a comfortable, well-lit home when they return. Business owners can automate lights to turn on at dusk and shut off at dawn. They can even control them according to time of day or day of the week, both locally and remotely with Honeywell Total Connect™ Remote Services. It's brilliantly simple!

Thermostat Control

- Z-Wave enabled thermostats can automatically adjust every time your customers arm or disarm their security systems—letting them enjoy comfort and savings without having to adjust their daily routines*
- Precise temperature control enables Z-Wave thermostats to provide better comfort, fewer temperature swings and conserve more energy*
- “Lockouts” can keep temperature limited to a minimum or maximum setting—ideal in settings where children or employees may attempt to adjust thermostats*
- Fan circulation feature moves air when heating or cooling is not required—saving energy and helping to eliminate hot or cold spots*
- Remote control is enabled with Honeywell Total Connect

*Compatible with Honeywell's ZWSTAT thermostat.

Picture Perfect

The vivid, 7" display brings memories to life for an incredible photo viewing experience—supporting over 16 million colors. It lets homeowners show off their treasured photos with the same glorious, real-life detail and vibrant colors as high quality prints.

- High-resolution 7" touchscreen shows images in eye-popping detail
- Displays photos or video
- Easily upload digital photos and videos from the camera's SD card
- Create and edit cinema-quality slideshows right at the Tuxedo Touch™ display

Sleek, Stylish Design

The extra large screen and choice of white or silver housings are ideal for any residential or commercial setting.

Dynamic Business Communications Tool

The digital picture frame feature lets customers showcase products in vivid detail, advertise sales and special promotions, post employee announcements, floor plans and more. To play videos, simply insert an SD card—a great way to show commercials and draw attention to display cases. You can even customize the screen with your company logo!

Some images are for illustration purposes and are subject to change.

Ceiling Fans

Z-Wave® enabled ceiling fans can be automated to turn on or off when your customers arm and disarm their security systems. They can also be programmed to turn on or off at specific times, work in conjunction with lighting and more.

Shades

Z-Wave enabled shades in homes and businesses can be automated for privacy and security by raising and lowering them at specified times. It's also a great way to reduce sun glare on computer screens, save money on energy bills and enhance workplace comfort.

Message Center

Your customers can conveniently record and playback voice messages for one another directly at the touchscreen.
