Honeywell

New VISTA® Turbo Fire Enhancements

VISTA-250FBPT, VISTA-128FBPT and VISTA-32FBPT

- Reduces cost and installation time
  - Eliminates cost and labor of installing 4100SM (serial) module
  - Eliminates need for battery sensing module to protect battery when extended AC outage occurs
- Improves performance with Honeywell WIN-PAK®, Pro-Watch®, Crestron® and other systems
  - Faster system response (eight times faster port communications)
  - System will not send faults over serial port when disarmed (option)
  - New feature for VISTA-32FBPT
- Provides additional smart sensor (V-Plex®) functionality in addition to inhibiting faults/restores during disarmed periods:
  - Supports unique "PIR masked" trouble display for smart motion sensors (DT7500SN)
  - Supports automatic test mode entry for smart motion sensors, saving installation time
- Provides Honeywell Total Connect™ 2.0 Remote Services support
- Supports up to six graphic keypads
  - 6280/Tuxedo Touch™ listed for commercial burglary
- Supports 10-digit contact ID account numbers
- Supports enable/disable of ULC S304 features
  - Holds old reports in buffer on phone line failure; sends later marked as old
  - 200-second stabilization time upon power-up or program reset
  - Five-second tone at the keypad if someone tries to arm while zone(s) faulted
- Can disable auto-stay arming feature by keypad address (for remote arming)
- Provides additional alpha zone descriptors for more flexible naming options
- Provides ability to enable/disable security for program mode entry
  - Master code + #65 opens 24-hour window for installer to enter program mode (also opens window for 24 hours after exiting programming mode)
- Uploading/downloading over GSM and IP Communicators
  - New feature for VISTA-32FBPT (already available on 128 and 250 models)
- Auto-restore of alarms (when used as fire communicator only)
  - Exclusive to VISTA-32FBPT
